

GROUND MOUNT SYSTEM GREEN TRACK®

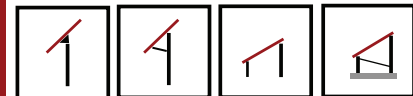

CODE : SDYG-GT

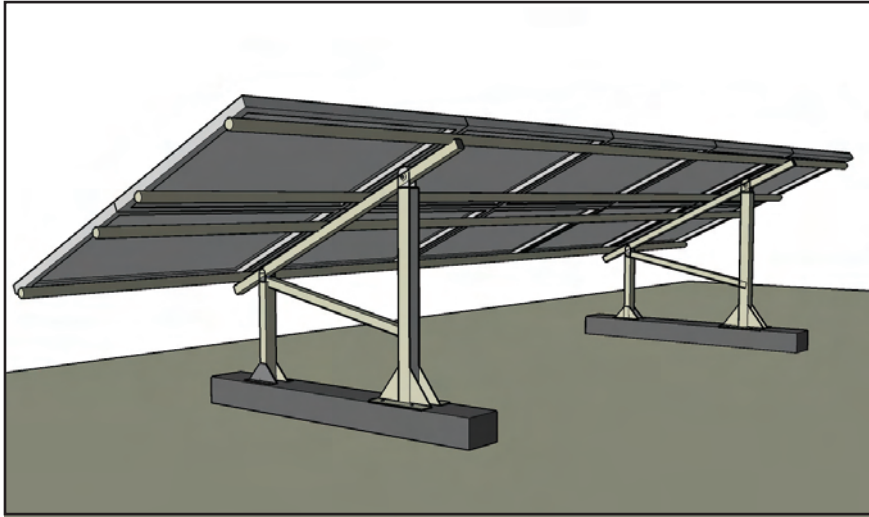

The **Green track®** is a highly versatile Ground-mount photovoltaic system.

This mounting structure is designed for small or large scale photovoltaic array.

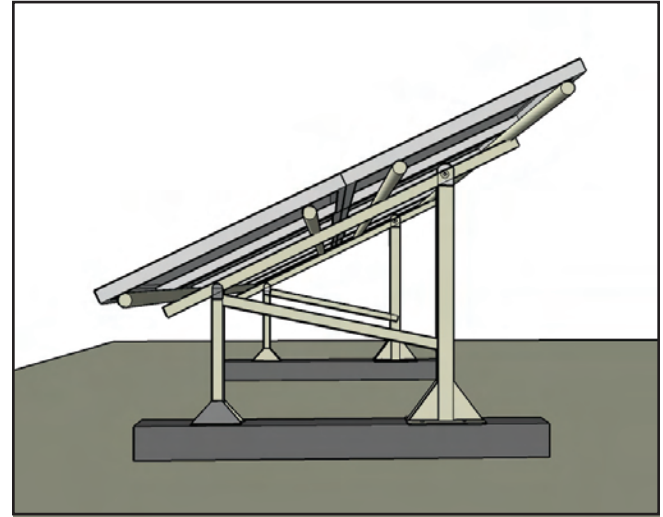

The high-strength structure module grounding system make Green track assembly for module installation exceptionally fast and the particularly time-saver PV mounting system.

The Green track structure can be install in foundations or mounted on ballast resting on the soil surface.

Each unit Green track structure can accommodate 1 KW (10 X 200Watts modules).
